EDUCATION

Learning Realm International (L.R.I) School

Kathmandu, Nepal

High School Diploma (+2 in Science)

EXPERIENCE

Interact Club of L.R.I School

Kathmandu, Nepal

Public Relations Director

Jun 2024 - Aug 2025

- Coordinated virtual workshop with 7 international Interact Clubs to deliver financial literacy education to over 600 youths, resulting in a 40% increase in financial knowledge retention among participants.
- Helped to conduct the program "Screening for Impact" to bring together more than 250 children from 7 orphanages for an educational session.

Robotics Association of Nepal (RAN)

Kathmandu, Nepal

Drone Workshop

Sep 2024 - Sep 2024

- Explored drone hardware architecture: brushless motors, Electronic Speed Controllers, flight controllers, LiPo batteries, and propellers; learning how each component contributes to flight stability and control.
- Practiced FPV drone piloting through simulation software before flying a real drone, gaining hands-on understanding of how transmitter inputs translate to directional commands and stabilization.

PROJECTS

Self-Hosted Linux Home Server

System Administrator (self-directed)

Nov 2025 - Present

- Built and configured a home server on repurposed hardware running Linux, managing OS installation, disk partitioning, user account creation, and permission management via the CLI.
- Configured secure remote access via SSH alongside core network setup including static IP assignment, port forwarding, and UFW firewall rules for controlled service exposure.
- Managed DNS via Cloudflare and experimented with both Cloudflare Tunnel and Nginx Proxy Manager as two approaches to secure HTTPS service exposure: with and without open inbound ports.
- Deployed and managed containerized applications using Docker and docker-compose handling container lifecycle, persistent volume mounts, environment variables, and troubleshooting networking and port conflict issues in a live server environment.

Personal Website

Solo Developer

Mar 2025 - Present

- Designed and developed a personal website from scratch, handling end-to-end frontend development, performance optimization, and deployment.
- Configured custom domain with Cloudflare DNS (A, CNAME, TXT records), SSL/TLS enforcement, and basic security settings including DDoS protection and firewall rules.

Radar System using Arduino Uno

Solo Developer

- Built a radar system using an Arduino Uno, integrating an ultrasonic sensor mounted on a servo motor to sweep across a 180° arc and detect object distance and angular position in real time.
- Visualized detection output using a Processing sketch that rendered a live sweeping radar display, mapping distance and angle data received over serial communication into a graphical interface.

SKILLS & INTERESTS

Skills: Linux, Docker, Git, GitHub, Python, JavaScript, C, ReactJS, Web Development, Cloudflare, Networking (DNS, Port Forwarding), SSH, Nginx, FreeCAD, Public Speaking, Leadership, Event management, Resource allocation

Interests: Generative AI, Automations, Computer Science, Aviation, Football & Futsal, Martial Arts, Marathons
